AAAI–05 Workshop Program

The Twentienth National Conference on Artificial Intelligence
Workshop Program

Call for Participation

July 9–10, 2005 ■ Pittsburgh, Pennsylvania

AAAI is pleased to present the AAAI-05 Workshop Program, to be held Sunday and Monday, July 9–10, 2005 in Pittsburgh, Pennsylvania. The program includes the following thirteen workshops:

- Contexts and Ontologies: Theory, Practice and Applications
- Educational Data Mining
- Exploring Planning and Scheduling for Web Services, Grid and Autonomic Computing
- Human Comprehensible Machine Learning
- Inference for Textual Question Answering
- Integrating Perception and Action in Multimodal Interfaces
- Integrating Planning into Scheduling
- Learning in Computer Vision
- Link Analysis
- Modular Construction of Human-Like Intelligence
- Multiagent Learning
- Question Answering in Restricted Domains
- Spoken Language Understanding

Participation in the workshop is limited to 25-65 participants, and is by invitation only. Workshops are included in the AAAI-05 technical registration, and all workshop participants must preregister for the AAAI-05 technical conference. Working notes will be distributed onsite for participants only, and may be available after the conference as technical reports.

Submission Requirements

Submission requirements vary for each workshop, but the key deadlines are uniform for all. Please mail your submissions directly to the chair of the individual workshop according to their directions. Do not mail submissions to AAAI.

Important Dates

- *April 20:* Submissions due to organizers
- *May 11:* Notification of acceptance by organizers
- *May 18:* Camera-ready copy due to organizers or AAAI
- *July 9-10: AAAI-05 Workshop Program*
