AAAI-2000 is the Seventeenth National Conference on Artificial Intelligence (AI). The purpose of this conference is to promote research in AI and scientific interchange among AI researchers, practitioners, and scientists and engineers in related disciplines. The conference provides a forum for a broad range of topics, including (but not limited to) knowledge representation, machine learning, autonomous agents, planning, robotics and machine vision, expert systems, theorem proving, commonsense reasoning, probabilistic inference, constraint satisfaction, game playing, automated diagnosis, data mining, natural language processing, neural networks, and cognitive modeling.

Timetable for Authors

❒ *January 18, 2000:* Electronic submission of abstracts
❒ *January 19, 2000:* Submission of six (6) paper copies to AAAI office
❒ *March 10, 2000:* Notification of acceptance or rejection
❒ *April 4, 2000:* Camera-ready copy due at AAAI office

Electronic Title Page

Because of the tight schedule required to assign reviewers, we require that authors who plan to submit a full paper declare their intention by sending AAAI a title page by January 18, 2000. This is done by using a web browser to fill out the form linked to www.aaai.org/Conferences/National/2000/Author/

The form will include the abstract, keywords, and other information as indicated. After submitting the form, the page will display a unique tracking number. Authors should print two (2) hard copies of this electronic title page (unstapled) and submit them with the hardcopy of their papers as described below. Information for authors without access to a forms-capable browser will appear on the web site.

Paper Submission

Authors should submit six (6) copies of the paper for review. Submissions may be no longer than 6 pages long including references, and formatted in AAAI two-column camera ready style. We cannot accept submissions by email or fax. Please send papers to:

> AAAI-2000
> American Association for
> Artificial Intelligence
> 445 Burgess Drive
> Menlo Park, CA 94025-3442
> *Telephone:* 650-328-3123

Reviewing for AAAI-2000 will be blind to the identities of the authors. Details on formatting and preparing the paper for blind review can be found at the Author's website noted above.

In addition to the six review copies, authors should submit two unattached copies of a separate title page including the title, tracking number, authors, and addresses. These can be printouts of the electronic title page (see above).

Submissions to Other Conferences or Journals

Papers submitted to this conference must not have been accepted for publication elsewhere or be under review for another AI conference. However, to encourage interdisciplinary contributions that are otherwise unlikely to be seen by AAAI audience, we may consider work that has been submitted or presented in part to a forum outside of AI.

The guidelines of the AAAI policy on multiple submissions, available at the Author's website noted above, must be carefully followed.

Review Process

Program committee (PC) members will identify papers they are qualified to review based on the information electronically submitted (the paper's title, content areas, and abstract). Reviews will be done blind to the identities of the authors and their institutions. Reviewers will make recommendations to Senior Program Committee members, who will meet and make decisions about all submitted papers. Final decisions on all papers will be made by the Program Chairs.

Publication

Accepted papers will be allocated six (6) pages in the conference proceedings. Up to two (2) additional pages may be used at a cost to the authors of $275 per page. Papers exceeding eight (8) pages and those violating the instructions to authors will not be included in the proceedings. Authors will be required to transfer copyright of their paper to AAAI.

Questions and Suggestions

❒ Concerning author instructions and conference registration, write to: ncai@aaai.org.
❒ Concerning suggestions for the conference and other inquiries, write to the Program Cochairs:
